OBJECTIVES

Find a budget friendly solution to enhance their home aesthetics for potential buyers who would wish to move in the near future.

OUR ONLY REGREST IS THAT
WE DIDN'T DO IT SOONER!

DECISION

When faced with a problematic conservatory roof that failed to provide the comfort and reliability they craved, Mr. and Mrs. Stempt embarked on a mission to enhance their living space.

Their vision was clear: they sought a budget-friendly solution that would transform their conservatory into a haven they could enjoy year-round, regardless of the weather conditions.

The pivotal decision to entrust SMARTPANELS with their dream conservatory project was driven by a desire for a practical, highly efficient, and cost-effective solution. The main idea, was to ensure they could enjoy a new conservatory roof engineered for year-round comfort, Mr. and Mrs. Stempt were drawn to the promise of advanced insulation and energy-efficient materials and great quality.

LEAKS

HEAT

NOISE

RESULTS

The replacement roof not only resolved the functional issues of their conservatory, but also added a touch of modern elegance to its appearance, enhancing the overall aesthetic appeal of their home. The new design carefully considered natural light, allowing it to flood the space while protecting against harmful UV rays.

The conservatory roof replacement project has significantly improved Mr. and Mrs. Stempt's home in several ways. It has allowed them to enjoy their conservatory year-round, regardless of the weather, thanks to the new roof. Secondly, the elimination of leaks has relieved a major concern and boosted their confidence in the conservatory's reliability. Lastly, the enhanced aesthetics of the conservatory have not only added value to their home but also increased its appeal to potential buyers should they decide to sell in the future.

SOLUTION

Mr. and Mrs. Stempt were highly encouraged by our proposal during our visit. They were informed that, following the installation of new panels, they would be able to enjoy a consistently comfortable indoor environment regardless of external conditions or weather. This perfectly aligned with their requirements, and the durable design of the new roof, renowned for its flawless record in preventing leaks, provided them with much-needed peace of mind, especially during rainy seasons.

Their choice to move forward with SMARTPANELS meant not just a roof replacement but a transformation of their conservatory into a reliable, usable space that aligned perfectly with their aspirations.

OUR ONLY REGRET IS THAT WE DIDN'T DO IT SOONER!

The conservatory roof replacement has completely changed how we use this space. It's comfortable, leak-free, and beautiful. We love spending time here now.

Thanks to the entire team!
